- **Sports Centres** – Energy efficient Cooling and Heating for sports halls, gyms and trampoline parks.

New Electric and Hybrid heating and cooling systems for increasing energy efficiency and cutting down on greenhouse gas emissions installed and maintained Nationally.

## New & Reconditioned Warm Air Heating / Radiant Systems.

CK Services are one of the UK's biggest suppliers and installers of both New and fully Reconditioned Warm Air Heaters and radiant heating – as well as offering highly competitive pricing on all New Heaters from the leading manufacturers. We also provide a comprehensive refurbishment service and overhaul of older heaters – saving you money on buying a completely new system.

Our reconditioned heaters come with a full warranty due to the high standard that we rebuild and rigorously test them in our factory before re-sale. All heaters are fully stripped, cleaned, repainted and rebuilt from the ground up, with new parts fitted where needed and are set back to the manufacturer's instructions.

If you want to cut down your carbon footprint, and your premises benefits from having good insulation and low heat losses – we can also provide advanced Electric and Hybrid heating and cooling systems.

Please visit our online store or contact us for any specific heating requirements you may have.

## Complete Cooling Solutions – Air Conditioning & Heat Recovery Installation & Services including Evaporative Coolers.

CK Services provide complete energy efficient Cooling Solutions and the design and installation of new Air Conditioning systems from a split system to a full VFR system – supplying many internal cassette units throughout large retail stores, warehouses, garages, offices, schools, bakeries and many other types of commercial premises.

A modern Air Conditioning system is far more energy efficient than they used to be, offering both Cooling and Heating from the one source. Quiet in operation, easily hidden away from view in either ceiling, wall or ducted formats, we can help you to choose the very best air conditioning system for your workplace.

With a Nationwide team of fully professional engineers, we can offer a complete service and maintenance package including reactive repairs, as well as bespoke design, supply and installation on all types and sizes of Air Conditioning, Heat Recovery systems and Evaporative Coolers from the leading manufacturers.

Please visit our website or contact us for any Air Conditioning or cooling needs you may have.

## Some of the additional services we provide:

We offer advice, support and installations that are second to none. Give our experts a call today to book a FREE site survey or for any further information about our services.

New Warm Air Heaters supplied & installed

Warm Air Heaters offer a cost-effective solution to heat many types of industrial and commercial building and are available in both suspended and floor mounted systems including Air Rotational Heaters for large racking and warehousing. Available in a range of fuels such as Natural Gas, LPG and Oil, CK Services are an approved supplier for all of the major manufacturers and including service and maintenance and repairs nationwide.

Radiant Tube and Plaque Heaters

Radiant Tube and Plaque Heaters provide an efficient, space saving heating solution. Ideal for most commercial buildings – including garden centres, garages, aircraft hangers, retail showrooms and properties that have a high heat loss factor, they can be used to 'spot heat' areas thus saving money on running costs such as a warehouse where the products do not need to be heated, but the production staff do. Available in both Natural Gas and LPG formats and Oil systems.

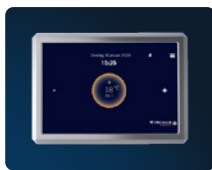

Commercial Boiler and Heating Systems

From a wall mounted condensing state of the art gas boiler, through to a large cast iron floor mounted oil boiler – CK Services can provide a full service from the initial design to installation and commissioning and modern controls. We also provide spares for boilers, a fitting service and also a modification service to existing systems.

### Hybrid Gas and Electric Heating

New technologies such as Electric heating and partial electric or partial gas heating systems we can design and install and provide a maintenance and servicing package nationally. New to the industry is a partial Gas System which can be installed in older and high heat loss buildings that works off hot water rather than refrigerant gas and thus produces a lot less carbon footprint than a standard gas heating system. Please call us for more details and a free quotation.

Service and Maintenance – Nationwide

Regular service and maintenance on Commercial and Industrial Heating and Air conditioning systems as well as certification is a legal requirement in the UK. We offer a full service with regards to annual servicing and reactive maintenance on all types of HVAC equipment.

Ductwork, Ventilation and Heat Recovery

We also offer a full design and installation service for all types of ducting – including Ventilation and Heat Recovery systems including square, spiral wound, flexible and insulated ducting, duct socks, fire dampers, inspection doors, protective cages & welding extract systems.
